

S3D CAMPUS

Mastering 3D, from filming to broadcasting

Stereographer Internationally known, Alain Derobe has oriented his work towards S-3D images since 1992. He was initially Director of photography for cinema and advertising films from 1966 to 1990. Alain Derobe founded AFC (French association of directors of photography), he is now president of UP3D, a European stereographers' association.

He started to develop the systems he needed for stereoscopic shot and with Didier Bogard he installed a line which allows to install stereoscopic units for a 4 metre-wide screen.

He was stereographer on "Safari3D", "Camargue", "Chartreux", "Irruption", "Héros De Nimes", "La R'volle", and the last production of Amak "Réveil Des Géants" as well as many corporate and event films.

Alain Derobe is a trainer about 3D from many years.

He is also a stereo movies consultant as well on cartoons (like Kaelou) as on feature films...
